## DIGITAL EDITION ARCHIVE

## Platform provider partners with payments

Paymentwall, a global payments platform provider, partnered with micropayment solution provider Mazooma, a real-time online banking system.

With this partnership, companies using Paymentwall's digital payment platform can give their users the option to pay for digital transactions with Mazooma's payment solution. Mazooma allows users to pay straight from their bank account in a secure system.

Mazooma's service will be integrated straight into Paymentwall's 2-click-payment system, where users can choose Mazooma to pay for their transaction, bypassing having to enter their credit card information.
